ABOUT THE SIMULATOR

The **Life/form**® “Surgical Sally” Bandaging Simulator is a replica of a 29" x 17" female with 14 surgical wounds, including a mid-sternal split with chest tube drain, a sacral decubitus ulcer – stage 2, and a leg amputation stump. The skin has also been reformulated so it is drier, allowing bandages to adhere better. Wound closures have been updated with surgical staples for the mid-sternal split, thoracotomy, nephrectomy, laparotomy, abdominal hysterectomy, and amputation stump.
