# bozzini® Hysteroscopy Simulator

The bozzini® Hysteroscopy Simulator is a simulated 'full stack system' that provides the closest to life experience for training hysteroscopic skills. The simulator is supplied with a standard 4mm hysteroscope, two hysteroscopic instruments, an HD camera system and 15" monitor and monitor stand. The compact table top design makes it the perfect system for use in simulation centres, doctors' offices or as a mobile training solution.

The camera and hysteroscope are powered by the bozzini® light system. The bozzini® light system allows simulated endoscopic procedures to be performed with real endoscopic devices at an affordable price.

**bozzini®**  
Hysteroscopy
